

**Abstract**

A vehicle shield device is provided according to the invention. The vehicle shield device includes a hood protector region and hood attachment region. The hood protector region is constructed for extending across at least a portion of a vehicle hood for protecting the vehicle hood. The hood protector region includes at least one flexible region for allowing folding of the hood protector region. The hood attachment region is constructed for attaching the hood protector region to a vehicle hood. The hood attachment region includes a first hood attachment flange attached to at least a portion of the hood protector region and constructed for attaching to a left side of a vehicle hood, and a second hood attachment flange attached to at least a portion of the hood protector region and constructed for attachment to a right side of a vehicle hood. The hood protector region and the hood attachment region can be provided from a molded and continuous plastic sheet. Methods for manufacturing and shipping a vehicle shield device are provided.
